EASYAPPSONLINE

Our agency offers a web based health insurance application Processing System and Employee Management system. EasyAppsOnline provides access 24/7 making pre-screening and open enrollment as easy as **1-2-3.**

- Employees enroll online with an electronic signature
- HR can monitor enrollment
- Agents can view completed apps and use the portal to submit them to various carriers
- Insurance underwriters love the easy to read applications

HOW IT WORKS

Application forms are pre-populated with basic employee information. Other data is completed by selection from drop down boxes. Once the employee is finished they click submit, which populates unlimited insurance applications making pre-screening a breeze. You can monitor employee enrollment, maintain employee data and stay on top of your company's insurance, all without a single piece of paper. Your employees will love **EasyAppsOnline** because it is easy to use and they only have to fill out the information once and they are done.

PRODUCT FEATURES

One generic form will pre-populate multiple carrier applications.

Information is archived for the user so that next year's enrollment is even easier, simply review and make updates as needed.

Electronic signature provides paperless pre-screening and enrollment.
